"Preliminary Agreement entered on this day ofTwo Thousand and Twenty Two, between the Regional Project director, RPMU Malappuram for and on behalf of Kerala Rural water Supply and Sanitation Agency of the one part and Sri. (full name and address of the tenderer). Here in after called the contractor of the other part for the execution of the agreement as well as for the execution of the work of Renovation works of Mettuvazhi Sarangmala WSS in Agali Grama Panchayath, Palakkad District

Kerala Rural water Supply and Sanitation Agency (KRWSA) invited tenders for the work as stated above by Notification No. 03/SUS/KRWSA/RPMU/MPM/AGA/2022 Dated 25/11/2022 in www.etenders.kerala.gov.in and the notice inviting tenders stated as follows :

Within **14 days** after the date when the acceptance of the tender has been intimated to him, the tenderer shall submit security deposit for the proper fulfillment of the same and shall execute an agreement for the work in the stipulated manner. If the contractor fails to execute the original agreement within the stipulated time, the earnest money shall be forfeited to KRWSA without any notice or in the case of the contract, fails to maintain a specified rate of progress and reason for delay is solely attributable to the contractor (to be specified in each case in the tender schedule) KRWSA shall terminate the contract as per the prevailing rules and rearrange the work at the risk and cost of the contractor and fresh tenders shall be called for or the matter otherwise disposed off.

If as a result of such measures due to the default of the tenderer to pay the required deposit to KRWSA results in any loss to KRWSA, the same will be recovered from him as arrears of revenue. The original contractor shall have no claim whatever to the sum that may be due to the contractor on this or any other subsisting contracts or under the Revenue Recovery Act or otherwise the KRWSA may decide.

NOW THESE PRESENT WITNESS AND it is mutually agreed as follows :

The terms and conditions for the said contract having been stipulated in the said tender form to which the contractor has agreed, a copy of which forms part of this agreement, it is agreed that the terms and conditions stipulated therein shall bind the part to this agreement extend to which they are abrogated or altered by express terms and conditions herein agreed to and in which accept the express provisions herein all supersede those of the same tender form.

2. If the contractor does not come forward to execute the original agreement within stipulated time (maximum of 24 days, as per clause 7.22.2) after the said work is awarded and selection notice issued in his favour, the earnest money shall be forfeited to KRWSA without any notice. If the contractor commits breach of any of the conditions of the contract and not following the work schedule chart, stipulated in the NIT therein KRWSA shall terminate the contract as per the prevailing rules and rearrange the work at the risk and cost of the contractor, otherwise or loss so sustained by the KRWSA shall be realized from the contractor under Revenue Recovery Act as if arrears of land revenue as assessed, taking into consideration the prevailing PWD rate and after giving due notice to contractor. The acquisition taken by such authority officer or officers shall be final and conclusive and shall be binding on the contractor.

3. The tenderer further agrees that any amount found due to KRWSA under or by virtue of this agreement shall be recoverable from the contractor from his EMD and his properties movable and immovable as arrears of Land Revenue under the provisions of the Revenue Recovery Act for the time being or in any other manner as the KRWSA may deem fit in this regard.
4. The contractor further assures it is clearly understood that the settlement of claims either by part bills or by final bills will be made only according to the availability budget provision and allotment of funds to the Regional Project Management Unit, Malappuram under respective heads of account in which the work is sanctioned and arranged and also subject to seniority of such bills. No claim for interest or for damages whatsoever shall be made for the belated settlement of claims of bills.

8.17. FINAL BILL

8.17.1 The final bill shall be submitted by the contractor within one month of the completion of the work as otherwise the Engineer in charge's measurement shall be accepted as final and binding.

8.17.2 Deleted

8.17.3 If any amount which by virtue of this contract, may become due to the contractor be not claimed for payment within three months from the date on which it falls due, the same shall be placed in deposit account and if the amount as placed remains for three years thereafter, the contractor or others to whom it may be legally due shall forfeit the same and it shall be finally credited to Authority.

8.17.4 On no account the final payment shall be made to the contractor before production of clearance certificate of taxes and proof of submission of Income Tax returns. The contractor shall produce document of remittance of GST before final payment. The Taxes as per prevailing rate shall be deducted from the Contractor's bill. Tenderers are however advised to collect necessary clarifications from the authorities concerned for ensuring the extent of various taxes applicable to the work before quoting their rate.

8.17.5 The release of amounts shall not be made if there is litigation with the contractor.

8.18 PAYMENT FOR EXTRA ITEMS

Over and above the scope of the work, the agreement executing authority shall order, in writing, to the contractor to do any extra items of work and the contractor shall be bound to comply with such orders of the Agreement Executing officer. The Authority shall pay the contractor for such extra items of work at the departmental rates prevailing at the time of the execution of original agreement. If there is no departmental rate, prescribed for such extra items of work, the rate payable to the contractor for the particular items shall be the market value of the materials plus the cost of labour actually engaged for the extra items for the work at departmental schedule of rate plus the contractor's profit of 10%.

8.19 (A) PAYMENTS WHEN ALTERATIONS ARE INVOLVED

No authorized variation shall vitiate the contract. The Authority shall have the right to make any alteration in the original project proposal/designs during the progress of the work and the contractor shall be bound to carry them out. The amount agreed to for the work shall be varied by adding to or deducting there from as the case may be, the value of all authorized alterations, additions, or omissions, the valuation being made on the same basis as for the extra items.

8.19 (B) Variation in quantity:

When there is variation in tender quantity, the rate quoted in form BOQ shall be for the specific quantity as per the NIT and scope of work. However, this quantity may increase or decrease by a maximum extent of 25%. In case of the quantity increase, the contractor will be paid at the rate as given in the accepted BOQ schedule. In case of the quantity decrease, the quantity of pipe not laid thereby (i.e. the difference between the scheduled quantity and actual quantity) shall not be taken into consideration and payment will be made only for actual quantity used at site.

8.20. PRICE ESCALATION

This contract does not have provision for price escalation under any circumstances except in the case of variation in statutory taxes and levies as noted in Clause 7. 9.3. Even if extension of time of completion has been granted under this contract, under any relevant provision, no escalation in price shall be admissible.

8.21. NO CLAIMS ON ACCOUNT OF FLUCTUATION OF RATES, IDLING OF LABOUR ETC.

8.21.1 No claim shall be entertained on account of fluctuation of rates of labour and materials, railway freight, income tax etc. at any stage.

8.21.2 No claim for idle labour, due to non -supply of materials by the Authority or for any other reason shall be entertained.

8.22. TESTING OF COMPLETED WORK

All tests necessary to ensure that the structure, equipment, pipe lines and fittings which form part of the work, comply with the specifications, shall be carried out at the site at the contractor's cost. First 200m laid will be tested first in order to check the quality of pipes and work executed. After that testing can be done as per the instruction of Kerala Rural water Supply and Sanitation Agency officials. Such tests shall be carried out within one month of the completion of the work and shall satisfy the requirements included under the Technical Specifications. If the completed work or any portion thereof is found to be defective before the works executed by the contractor are taken over by the Authority, the Regional project Director will give the contractor a notice in writing setting forth the particulars of such defects, and the contractor shall forthwith make the defective part, good or replace the same for satisfying the requirements of the contract. Should he fail to do so within the time specified by the Regional project Director, the Regional project Director may make good the defective part or

replace the same at the cost of the Contractor and such replacement shall be carried out by the Regional project Director to the same specifications as in the contract. In the event of contractor refusing to comply with the instructions of the Regional project Director within the specified period, the contractor is liable to be penalized as per clause 8.10 above.

8.23 GUARANTY PERIOD

8.23.1 The guarantee period for the work is 12 months after successful completion, testing, trial running and commissioning of the work.

8.23.2 If it becomes necessary for the contractor to replace or renew any defective portion of the work, the provision of this clause shall apply to the portion of the work so replaced or renewed until the expiration of 12 months from the date of such replacement or renewal or 12 months from the date of completion whichever is earlier. If the defects are not remedied within the notified time, the Regional project Director may proceed to do the work at the contractor's risk and expense, but without prejudice to any other right, which the Regional project Director may have against the contractor in respect of such defects. Until the final certificate of having completed the warranty period successfully has been issued, the contractor shall have the right of entry at his own risk and expenses by himself or duly authorized representatives whose names shall have previously been communicated in writing to the Regional project Director, at all reasonable working hours for the purpose of inspecting the work and taking notes there from and if he desires, at his own risk and expense, making any tests, subject to the approval of the Regional project Director.

8.23.3 Any defects noticed during the warranty period shall be properly rectified to the satisfaction of the Authority by the contractor at his own risk and cost.

8.24 MAINTENANCE PERIOD AND TRAINING OF THE OPERATIONS

After the completion of the work and issue of completion certificate by the Engineer in charge, the system shall be run, operated and maintained by the contractor for a period of 12 months. The satisfactory and efficient functioning of all the components installed by the contractor for this project should be conclusively proved to the satisfaction of the Regional Project Director. The contractor shall also train the Authority staff during the period of maintenance in running and maintaining the system independently and in an efficient manner i.e. during the 12 months maintenance period the Authority staff and contractors personnel shall be simultaneously engaged in the operation of the system.

8.25 EXTENSION OF TIME OF CONTRACT

Time is considered as the essence of this contract. Any delay due to exceptionally adverse climate conditions or other special circumstances of any kind other than default on the part of the contractor shall fairly entitle the contractor for consideration of extension of time of completion for the work without any extra claim. However, such extension shall be at the sole discretion of the employer and without prejudice to the rights of the Authority to terminate the contract treating time as the essence of the contract. The Authority is not bound to take into account any extra ordinary circumstances unless the contractor has submitted full and detailed particulars within 15 days of the incident, which affected the progress of the work. Further, any such extension granted shall not relieve the contractor from the interest on the advance, if any, drawn by him. Nor shall he be eligible for the incentive for earlier completion of the works during the extended period. All other conditions are as per G.O (P) No.84/97/PW&T dtd 19.8.97)

8.26. HANDING OVER OF WORK AND CLEARANCE OF SITE

The maintenance period shall start after successful completion and commissioning and the handing over shall be after one year of operation and maintenance period.

8.26.1 The contractor shall hand over all works executed under the contract to the Authority complete in all respects and to the satisfaction of the Regional Project Director at the end of satisfactory completion of the maintenance period.

8.26.2 The Regional Project Director shall determine the date on which the work shall be regarded as having been completed as contemplated in sub clause above and shall, in support of his determination, grant a certificate to the contractor on an application being so made to him, that the work was duly executed and completed in all respects, on a date to be specified in the certificate and such certificate shall for all purposes be deemed to be the conclusive proof of the date on which the work was so completed. The Regional project Director shall also from time to time determine the date on which any particular stage of the work shall have been completed and shall, on application, grant a similar certificate to the contractor who shall be bound to follow all such determination in all subsequent dealings with the Authority on the subject matter of the contract in regard to the work.

8.26.3 On completion of the contract, the contractor shall clear away and remove from the site all construction plant, surplus material, rubbish, debris and all temporary works of every kind and leave whole of this' site and work in a neat and clean condition to the satisfaction of the Regional Project Director. No final payment in settlement of the account of the work shall be made to the contractor until, in addition to any other condition necessary for such final payment, the site clearance shall have been effected by him, and in the event of the failure of the contractor to comply with the provision of this Sub Clause within 7 days after receipt by' him of a notice to that effect, such clearance may be made by the Regional Project Director at the expense of the contractor and in all such cases the Authority shall not, in any way be liable for any loss or damage to any property of the contractor left at the site caused by such removal, there from and such removal may without prejudice to any other mode of removal be effected by means of public sale of such materials and property or by such other means as may be deemed fit and convenient to the Regional Project Director.

8.26.4 Deleted

8.27. SETTLEMENT, ARBITRATION OF DISPUTES AND NON APPLICABILITY OF ARBITRATION

8.27.1 Settlement of disputes by Arbitration shall not be applicable to this contract.

8.27.2 In the case of any disputes arising between the parties to this contract on any of .the matters covered under this contract, the same shall be settled solely by a competent court having jurisdiction within the State of Kerala, and by no other Court.

In addition to the above, the contractor shall also maintain daily and weekly returns of labour employed by him and these shall be made available for verification by the officers of Kerala Rural Water Supply and Sanitation Agency as and when called for.

9.25 CONTRACT DOCUMENTS AND MATTERS TO BE TREATED AS CONFIDENTIAL

All documents correspondences, decisions and orders concerning the contract shall be considered as confidential and / or restricted in nature by the contractors and he shall not divulge or allow access to them by any unauthorized person.

9.26 MATERIALS TO BE SUPPLIED

It shall be the responsibility of the contractor to arrange for materials and the Authority shall not issue any material to the contractor.

9.27 CONTRACTOR'S RESPONSIBILITY FOR STORES

The materials such as Cement, MS Rods, tor steel and other materials including pipes and specials required for the work shall be procured by the contractor and the amount quoted should be inclusive of the cost of cement, steel and all other materials. The cement supplied for use shall be as per ISS 269/1976 and steel as per ISS 1786/1985 with latest amendments, if any. The materials should bear the relevant ISI/ISO certification marks. Before using any material for the work, the contractor, at his own cost, shall submit to the Regional Project Director for his approval such samples of material as are proposed to be used. The materials shall strictly conform to the specifications approved by the Authority. Notwithstanding anything contained in this clause, the contractor shall be held fully responsible for the quality and soundness of all the materials and machinery that are supplied by him for the execution of the work and completion of the project and the Regional Project Director's approval shall not in any way absolve him of his responsibility in this matter. The standard tests as per ISS to ensure the quality of cement, steel and other construction materials shall be got done by the contractor at their cost as per the direction of the officers of Kerala Rural Water Supply and Sanitation Agency to ascertain the quality. The Authority reserves the right to super check the results. If the materials supplied are found to be not passing the tests, the same shall be rejected by the Regional Project Director and the contractor shall be bound to dismantle and remove such constructions already made using such sub standard quality materials if found during the erection of the work and the contractor shall be fully responsible and liable for such losses to the Kerala Rural Water Supply and Sanitation Agency.

9.28 MATERIALS AND PLANT AT WORK SITE

All materials and plants brought by the contractor in or upon the site or on the land occupied by the contractor in connection with the work and intended to be used for the execution thereof shall not be removed from the site of work without the permission of the Regional Project Director.

9.29 GENERAL

All other conditions shall be as in force in the Kerala Rural Water Supply and Sanitation Agency, if it is found relevant to explain any clause of this N.I.T. Otherwise the conditions are strictly independent.

The Regional Project Director

KERALA RURAL WATER SUPPLY AND SANITATION AGENCY

10. GENERAL TECHNICAL SPECIFICATIONS

10.1 GENERAL

10.1.1 Generally, the specifications of all materials and work pertaining to this contract shall be governed by the relevant Indian Standards and by MDSS. In the absence of Indian Standards, the British Standard Specifications shall be followed. The specifications furnished hereunder are only to enlighten the tenderer on the requirements of Kerala Rural Water Supply and Sanitation Agency and are not intended to be against any other specifications stipulated by BIS or other standards and common practices widely adopted in the country at present. In case of a doubt regarding the specifications, the Engineer in charge will clear the doubts and give final decision based on the written request of the contractor. The decisions intimated in writing shall be binding on the contract work.

10.1.2 The successful completion of this contract calls for site surveys, investigation, planning, hydraulic and structural design of the components, assessment of capacity/standard of mechanical, electromechanical and electrical items to be procured, preparation of procurement schedule, preparation of implementation schedule etc. The tenderer shall see that he always sticks on to conservative designs based on time tested and well accepted practices as per the guidelines and norms prescribed by BIS, CPHEEO or such other institutions.

10.1.3. REPORTS, DESIGNS AND DRAWINGS

1. Deleted

10.1.4 ECO -FRIENDLY SYSTEM OFFER

The system offered and as completed shall be environment friendly and shall not affect /alter the environment beyond any permissible limits stipulated by concerned institutions.

10.1.5 MAN MADE STRUCTURES, OTHER UTILITIES - AFFECTING THE WORK

1. When the works under this contract are executed situations may arise when the works are affected by other manmade structures either in service or abandoned. It is also likely that other utility services installed by various Government bodies are affected by the works under this contract. It shall be the duty of the contractor to ensure whether adequate sanction has been obtained from the authority concerned for the work with the help of Kerala Rural Water Supply and Sanitation Agency before the works of such affected portions are undertaken. Any damage caused to any of the manmade structure or any of the utility services will have to be made good by the contractor at his cost. The contractor has to restore the original position if he has to demolish any structure like culverts, compound walls etc during the course of work at his own cost.
2. However, restoration of PWD roads is exception to this. The KRWSA will bear the cost of such restoration of roads provided damaging of the road was essential for the execution of works under this contract. However the contractor should make the road trafficable as far as possible to the maximum extent after the work of laying pipes as per the direction of Engineer in charge.

10.2 EARTHWORK EXCAVATION

Earthwork excavation means earthwork in all classes of soils / rocks whenever removal shall be not by blasting. Earthwork excavation shall be done with adequate care so that underground service lines or adjacent structures are not damaged and appropriate protective measures such as shoring / strutting / sheet piling etc. are adopted for such items as required and approved by the Engineer in charge of the work. The width of trench should be as per the requirement and as per standard data book and a minimum cover above crown of pipe should be maintained as per clause 10.13. If the width of trench exceeds the minimum requirement as noted above, due to faulty workmanship /protection/shoring etc. the additional payment for the extra damaged road width payable to PWD/NH local bodies etc. shall be recovered from the contractor's bill. Excavation by blasting shall be got done only through persons holding valid license for use of explosive material and for blasting purpose. Further all rules prescribed by the Inspectorate of Explosives shall be strictly adhered to whenever blasting is resorted to. Blasted material like the excavated rock shall be the property of Government of Kerala. Disposal of the materials up to a distance of 10 km from the site as well as cartage of excavated material during excavation and back filling up to a maximum distance of 5.0 km will have to be done whenever essential by the contractor at no extra cost.

10.3 FILLING / BACK FILLING

Filling / back filling shall be done only with approved materials. It shall be compacted to get the following results. The density of the filled materials at different depths shall not be less than 95% of the natural field density in case of back fill and shall not be less than 95% of maximum dry density obtained in proctor compaction test or such other approved tests whenever filling is done to get the desired formation ground level. It shall be ensured that the density thus obtained under compaction is uniform at all depths of the fill. The contractor is bound to bear the cost of any test conducted to ascertain the above condition in case of doubt. The filling/backfilling done along PWD roads or such properties owned by other department/institutions, the same shall be further governed by specifications of such owner.

10.4 SHORING

Shoring shall be essential in excavation in all classes of soils whenever depth of excavation exceeds 1.50m and labourers have to work in trenches or close to edges of trenches as per the direction of Engineer in Charge. In ordinary soils and loose soils, shoring shall be done for trenches of shallower depths also considering the chances of collapse of sides. Shoring shall be done as approved/directed by the Engineer in charge of work.

10.5 FENCING

Fencing shall be done in the approved manner along the side of pipeline trenches on roads or other places for preventing accidents on both sides, if required in the opinion of the Engineer in charge.

10.6 FORMATION OF ROADS

Formation of roads shall be done as per IRC rules and regulations for the use of desired class of vehicles mentioned in the scope of the work. Whenever road formation comes in the scope of the work, it shall be understood that all cross drainage work, side drain works, radius of curvature and super -elevation etc. are included in the scope.

10.7 RUBBLE MASONRY

Rubble masonry works using approved quality blasted rubble either as random rubble masonry or coursed rubble masonry shall be permitted. Minimum width of the random rubble masonry shall not be less than 450mm in any case. Only cement mortar 1:6 or richer shall be used for such works. Mixing by weight at the above ratio for mortar shall be permitted only when the fine aggregate is in dry condition. Exposed surfaces of rubble masonry shall be pointed using 1:3 cement mortar to have a pleasing appearance provided it is left un-plastered with cement mortar.

10.8 BRICK WORK

Brick masonry using wire cut bricks / first class country burned bricks having a minimum crushing strength of 35 Kg / cm satisfying other tests specified by BIS and least dimensions not less than 70mm shall be permitted. Brick masonry works shall be of minimum 200 mm width, constructed in English bond with cement mortar 1: 6 or richer and plastered with cement mortar 1: 4 or richer in all cases. However, in each case of parapets or other dwarf walls of height less than 700 mm, thickness of masonry can be reduced from 200mm provided pilasters of minimum 200 x 200 mm are constructed monolithic with such walls at a center to center spacing of maximum 3000mm.

10.9 PLAIN AND REINFORCED CONCRETE

10.9.1 DESIGN ASSUMPTIONS

IS 3370 Code of Practice for concrete structure for storage of liquids

Part I : 1965 (or latest edition) General requirements

Part II : 1965(or latest edition) Reinforced concrete structures.

Part IV : 1967(or latest edition) Design tables

IS 2502/1963 (or latest edition) Code of practice for bending and fixing of bars for concrete reinforcement. All RC C/Steel structures shall be based on the relevant IS Codes. Strict adherence must be established to accepted codes of Practice relating to design. Minimum cover to reinforcement for RCC work shall be provided as per IS 456 -2000 (or latest edition). The effect of seismic forces shall be taken into account in the design as per the relevant code of practice.

10.9.2 CEMENT

The contractor will have to procure the cement for the work. The cement used in the work of plant or water front structures should be sulphate resistant - Portland cement of reputed companies having ISI mark. The KRWSA will have the option of rejecting the cement procured by the contractor and ask for replacements, in case of any doubt on quality and age of cement supplied at site. Random /grab sampling and test of the cement will be got done as per the norms of KRWSA.

10.9.3 REINFORCING STEEL

Only Corrosion Resistant Steel (CRS) is to be used for the steel structures. The contractor has to procure all the steel required for the work. The steel so procured should be from reputed companies like SAIL, TISCO etc. and the KRWSA will have the option to select the brand and to ask for replacement, if the material is found not having adequate

quality. The MS/T OR rods supplied for the work shall be cleaned and scrapped to be free of scales rust etc., before placing in forms for R.C.C work.

10.9.4 AGG REGATES

The coarse and fine aggregates shall comply with IS 388 -1980 or latest edition and may be used after sufficient tests have been carried out and approved by the Regional Project Director. All aggregates shall be stored on hard impervious surface to ensure exclusion of all foreign materials.

10.9.5 WATER

The water for mix shall be clean and free from harmful matter as per IS standards and taken from a source approved by the Regional Project Director.

10.9.6 ADMIXTURES

Only where a beneficial effect is produced shall any admixture to be used and that too after tests have been carried out to convince the Regional Project Director that no harmful effect will be produced by the use of such admixture and after approved by the Regional Project Director. Time tested admixtures shall be permitted to be used for concrete based on testimonial of performance to improve the quality of concrete with respect to its strength, water tightness or for other specified purposes as required for the work.

10.9.7 MIXING

The grade of concrete shall be as per IS 456:2000 or its latest revision. All water retaining or water front structures and machine foundations shall be made in RCC mixes not leaner than M25. The mixing time shall be between 2 to 4 minutes. The contractor should produce mix design for all grades of concrete to be used for the work and get approval from the Regional Project Director before commencement of concreting.

10.9.8 CONCRETING

The concrete mix shall be in specified proportions satisfying the maximum aggregate size/water cement ratio and required cube strength and workability. Such concrete must be adequately vibrated to form solid mass without voids. External vibration by the use of pneumatic hammers shall be deemed adequate except for thin sections.

10.9.9 TRANSPORTATION AND PLACING

Transportation and deposition of concrete mix shall be done rapidly and accurately with minimum re-handling. The mix must not be dropped from such a height as may cause segregation and air entrapment. When the mix is placed in position, no further water shall be added to provide easier workability. No concrete mix shall be used for the work if it has been left for a period exceeding its initial setting time before deposited and vibrated into its final position in the member. Sufficient number of cubes must be made for testing as per the relevant BIS code specifications. It shall be tested as per the specification and a complete register of entries shall be maintained by the contractor. It shall be brought to the notice of the Engineer in charge as and when directed by the departmental officer. The cost of all such testing shall be borne by the contractor.

10.9.10 CONSTRUCTION JOINTS

Construction joints shall be avoided wherever possible, and if found necessary, should be of such form to encounter direct compression. A stepped joint being preferred in such a case.

10.9.11 CURING

Curing shall be done as per relevant provisions in the IS code to allow the concrete attain strength through normal hydration and to avoid excessive shrinkage or harmful effect to the member. The method adopted shall be effective and any special method used must be approved by the Regional project Director.

10.9.12 REMOVAL OF FORM WORK

Removal of form work shall be done as per the provisions in the BIS and as per direction of the Regional project Director and in such a manner that no damage is caused to the deflection to minimum deflection, when unsupported and as per the direction of the Regional project Director.

10.10 DOORS, WINDOWS AND VENTILATORS

10.10.1 Wooden doors and windows and ventilators shall be made as per the approved DATA only and the size of doors, frames, shutters etc shall be not less than the sizes specified in MDSS, PWD standard data book etc. All parts of the door shutter or frame shall contain only hard wood seasoned. Wooden doors and shutters shall be provided for interior doors of office room s/private rooms etc.

10.10.2 Steel doors, windows and ventilators shall strictly conform to the specifications of BIS. Steel doors, windows and ventilators shall be permitted only for locations where aggressive conditions damaging the doors do not exist and when appearance of the same do not adversely affect the pleasing appearance of the main view and aesthetic condition of the structure. Steel windows and ventilators shall have crossbars for preventing through passage of solid materials of least dimension of 120mm in open position provided in aesthetically pleasing manner.

10.10.3 For areas directly facing the main views of the structure, aluminium doors, windows and ventilators shall be provided for improving the front view of the structure so far as there are no aggressive surroundings damaging the life or the pleasing appearance. All aluminium Sections shall be anodized as per ISS.

10.10.4 PVC doors of specifications conforming to those of BIS or of better quality may be used for water closets, bathrooms or other locations where splashing of water may affect the life of other type of doors.

10.11 PLASTERING OF EXPOSED SURFACES

All exposed concrete surfaces shall be plastered with cement mortar 1:4 or richer mixes. Exposed surface means exposed to air or water or any other gaseous or liquid medium. Surfaces of concrete structures other than water retaining structures can be permitted to be left unflustered under the following conditions:

- a) The surface left unflustered is perfectly even without markings of form work or undulations or unevenness greater than 0.5mm.
- b) The surface texture is perfectly uniform and the appearance is pleasing.

10.12 TESTING OF WATER RETAINING STRUCTURES

All water retaining structures shall be filled with water and tested for water tightness before the commencement of plastering. For water retaining structures the requirement of the test shall be deemed to be satisfied if the external faces show no sign of leakage and remain apparently dry, over a period of observation of seven days after filling up to maximum water level and allowing seven days period for absorption, if the structure does not satisfy the condition of the test and the daily drop of water level is decreasing, the period of test may be extended for a further period of seven days, and, if the specified condition of the tests are satisfied, the structure shall be considered to have withstood the test.

10.13 PIPES AND PIPE LAYING

The material and class of pipes used for the contract shall be as specified in the Scope of Works or tender drawings in the "Scope of Works." In case the pipes have not been specified for an item of work, the contractor shall put forth his proposal in accordance with CPHEEO guidelines and rules of BIS and get prior approval from the Engineer in charge. Pipe laid underground shall have a minimum earth cover of 1.00 m above its crown and in such a manner that the bedding angle is not less than 120, and the loads of pipe carrying liquid and the overlaying substance transmitted to the soil uniformly through the entire barrel of the pipe. For AC pipes, such cover above the crown shall be 1.20m at the alignment over which heavy traffic is expected. Whenever special fill materials are required to achieve this goal, sandy soil / river sand shall be provided at no extra cost by the contractor and on the approval obtained from the Engineer in charge. Wherever the cover for the pipe is less than 1.00 m, approved protective measures shall be taken and necessary works executed to see that the pipes are not damaged due to any external loads. In cases where the pipes are laid at ground level, adequate protective works ensuring the safety, serviceability and durability of pipes as approved by the Engineer in charge shall be undertaken as part of the contract. When pipes are over the ground; the support shall be designed and spaced in such a manner that the total stress induced in the pipe shell material at any section does not exceed the safe permissible values. In no case, the socket or spigot shall be allowed to transmit weight of other parts. For design purposes, minimum vertical and horizontal loads of 150 kg/m shall be assumed to act on the pipeline over and above the other known loads. Pipes rising vertically or at angles greater than 20° to the horizontal and which cannot carry / transmit the load through the shell of the barrel uniformly shall be only of flanged pipes. These pipes shall be supported appropriately both vertically and horizontally to ensure the positional fixity in the desired axis in such a manner that no part of shell of the barrel is subjected to stresses above safe permissible values.

During lying of pipe line, the open end of pipes shall be kept closed with dummies, blank flanges or end plugs at closure/suspension of work to prevent entry of soil, or, other unwanted material inside the pipe. No pipe shall be left open for period exceeding 30 minutes even in the presence of responsible personnel. Lying of pipes should be done in accordance with relevant IS codes with its latest amendment and revisions.

GENERAL

This specification covers supply, testing and delivery of DI, GI & PVC pipes of required length. The pipes are to be designed to withstand the effect of internal water pressure, external loads and surge pressure.

The intending tenderers should produce an undertaking with the manufacturers of pipes and specials regarding the capability to cope up with the contract, specification /quality etc. and submit it along with the tender.

Quality of materials and manufacture

Quality of materials and manufacture of pipes and specials should confirm to the relevant BIS or ISO Specification and shall have the respective certification marks of the Standard organization

Marking on Pipes

Each pipe shall be legibly marked with the following details :

- i. Manufacturer's name or trade mark
- ii. Nominal size (as per relevant ISS) Pipe description - class and grade.
- iii. Relevant ISI/ISO Certification markings

All dimensions and specifications shall strictly adhere to the relevant I.S codes/ISO Standards and as amended up to date.

Testing of pipes

The field test pressure to be applied shall not be less than the greatest of the following.

1. 1.5 times the maximum sustained operating pressure
2. 1.5 times the maximum pipeline static pressure
3. Sum of maximum sustained operating pressure and maximum surge pressure
4. Sum of the maximum static pressure and surge pressure subject to a maximum for any pipe and fittings incorporated.

SURGE PRESSURE:

The maximum surge pressure should be analyzed based on the data supplemented and in no case the sum of maximum operating pressure and the calculated surge pressure should exceed the allowable field hydrostatic test pressure. Computer model analysis shall be got done for the pumping line right from the pump's delivery point up to the exit point of water by any reputed institutions approved by the Authority and detailed reports of the institutions shall be furnished to the Authority.

HYDRAULIC DESIGN OF PIPE LINES

Hydraulic design of pipelines etc. where design based on Hazen William's formula as recommended by the Water Supply Manual is used, selection of the formula shall be done to get the higher design values.

Design of fittings

The following information shall be clearly marked on each fitting.

- (1) Nominal size and weight / wall thickness
- (2) Classification based on pressure
- (3) Manufacture's name.

10.14 SUPPLY OF MATERIALS

10.14.1 SUPPLY OF PIPES

All pipes as per the scope of the work supplied should be factory tested and test certificate as per relevant specification/latest code of practice should be produced along with the pipe supplied. The testing of pipes and the authentication of test certificate should be done by an approved third party inspection agency agreeable to KRWSA and witnessed by the technically qualified officers of KRWSA, if the contract value exceeds Rs.100 lakhs and by a Departmental Officer deputed by KRWSA if the contract value is less than Rs. 100 lakhs. In case the pipes are imported from abroad, samples for metallurgical and mechanical tests shall be taken from pipes selected at random and the final acceptance of the pipes will be based on the results of such tests conducted at any of the reputed laboratories.

10.14.2 SUPPLY OF M.S PIPES: LINING

MS pipes are to be lined at the contractors own arranged site located in or around the project area in the presence of Authority Officers. Shop lined pipes will not be accepted. Lining should conform to IS 1916 - 1989 or its latest edition. Minimum lining thickness, cement content, Characteristic compressive strength etc. should be as per the IS specifications. River sand used should be properly cleaned and sieved and only aggregates conforming to IS 383 (or latest edition) and with required uniformity coefficient shall be used.

(a) INSIDE LINING

Clean the surface of the pipe for removing rust and other unwanted matter by sand blasting or other approved methods. Mound the pipe on the spinning machine and get the cement mortar of 1:2 applied and compacted uniformly by centrifugal action over the entire area. The line pipes shall have a smooth surface inside it and shall be free from ricks and patches after curing. At joints the pipes should be given lining of minimum thickness as per IS specification with CC 1:1 using wire mesh of approved gauge.

(b) OUT SIDE LINING WITH CEMENT MORTAR:

The surface shall be cleaned as in (a) above. A wire mesh of 50 x 50 x 3 mm or nearest size approved by the Engineer in charge shall be wound over the pipe keeping a uniform gap of 13mm from surface of pipe and fix the same by use of spacers, welding etc. in the approved manner. Cement mortar 1:3 shall be applied by guniting or other approved techniques to attain minimum thickness as per IS specifications and cured appropriately. The surface so finished shall have a fairly uniform finish and shall be free from cracks and patches.

(c) OUTSIDE LINING WITH COALTAR etc.

Outside lining with hot applied coal tar / as phaltic enamel reinforced with fiber-glass fabric yarn as per IS 10221 -1982 or its latest edition or relevant American / British standards shall be provided based upon the observed soil receptivity in Ohms -cm.

(d) ALL TENDERERS SHOULD QUOTE FOR INSIDE LINING WITH CEMENT MORTAR

Tenderers who have quoted only for lining with cement mortar inside and outside lining with hot applied coal tar (alternate offer) will not be considered.

(e) After inside lining, pipes should be cured in a curing pond for a minimum period of 7 days or as provided in the latest IS 5822. Minimum cover of pipe as per IS / Manual shall be provided. The detailed specification of site welding of joints should be furnished by the contractor with relevant IS / British / American standards. The welding electrodes used should also conform to relevant IS / British / American Standards.

10.14.3 SUPPLY OF SPECIALS

The supplied specials should be tested as per relevant specification and latest code of practice. The certificate of testing should be authenticated by the technically qualified officers of KRWSA or a third party agreeable to KRWSA.

8.14.4. SUPPLY OF EQUIPMENTS

The works to be executed under this contract shall call for procurement of a number of mechanical items and equipments. The contract or shall procure any equipment / item only after the Authority has approved the manufacturer of the same. Any item / equipment procured and used shall, as far as possible bear certification marks of BIS, BSS or such other standard institutions of international repute and shall be brand -new only. Further care shall be taken that any part / component of such equipment, which require periodic replacement, shall be readily available in the market. Equipments requiring periodic replacement of nonstandard, unpopular or odd items shall not be procured or used for the fulfillment of this contract. Equipments requiring periodic maintenance shall be identified and a preventive maintenance schedule prepared for such equipments and handed over to the Authority.

10.14. 5 ELECTRICAL INSTALLATIONS:

All electrical installations shall be done as per the IE rules and with the concurrence of the Electrical Inspectorate and /or Kerala State Electricity Board. All electrical works shall be done only through approved / licensed persons having qualification, experience and expertise to do the work. It shall be the contractor's sole responsibility to get any clearance from the Electrical Inspectorate.

10.14.6 ELECTRICAL AND ELECTRO - MECHANICAL ITEMS

All electrical and electromechanical items shall be procured from the manufactures approved by the Authority. Any item procured shall bear certification marks of BIS / BSS or another institution of international repute. For any equipment / system requiring periodic maintenance, preventive maintenance schedule shall be prepared and handed over to the Authority as part of fulfillment of this contract.

10.14.7 VALVES

- a. Valves shall be as per IS Specification. Valves shall be double -flanged valves unless specifically permitted by the Engineer in charge. It is permitted to use valves of small diameter than the pipe diameter where it is used provided the valve diameter is not less than 67% of the pipe diameter and approved tapers are provided on both sides to ensure that the changes in the cross sectional area is attained gradually. Valves shall have hand wheel except where provisions of hand wheel shall hinder some other specifications requirements. Valves of diameter 400 mm and above shall be geared / butterfly valves. Valves shall be provided with an appropriate seating so that weight is not

transmitted to the adjacent pipe body. Anchoring of pipes at bends or such other locations shall be done in such a manner that the joints of the bend with the straight pipes are not embedded in concrete and easy working of the joints is possible. Scour valves shall be as per the standard specification.

- b. Zero velocity valves / pressure relief valves / surge arrestors etc. shall be used wherever necessary for ensuring the safety of the pipelines. The tenderer should do the water hammer analysis of pumping main and provide appropriate water hammer devices. The system and location proposed should be specifically mentioned in technical bid. The provision of such installations shall be subject to the condition that (i) the hydraulic design of these item are approved by KRWSA (ii) the particular brand valve proposed to be used is a time tested one as per the testimonials furnished, (iii) the guarantee card of the system issued by the manufacturer is handed over to the Engineer in charge (iv) such guarantee issued by the manufacturer / tenderer is valid for a period of not less than 5 years of service and (v) the terms and conditions of the guarantee are accepted to KRWSA / Engineer in charge. Fabricated pipes and specials shall be permitted to be used, provided (i) they shall have definite advantages at the particular place proposed, (ii) they satisfy all design requirements for the efficient and long lasting performance of both hydraulic and other functions and (iii) fabrication shall be attained by the seamless continuous welding.

10.14.8 AIR VALVES

Suitable air valves shall be as per standard specifications conforming to relevant G& K catalogue. Air valves shall be invariably provided at essential locations inside a valve chamber and all Air valve shall be supported with same size of control valve below it. For more details in scope of work may be referred.

10.14.9 BENDS & SPECIALS

Bends may be in horizontal plane, vertical plane or in both planes and at angles varying from $11 \frac{1}{4}^{\circ}$ to 90° . Care must be taken to avoid 90° bends as far as possible and in case it becomes inevitable, permission for the same must be obtained from the Engineer in charge, before laying of pipeline at that section. Bends and specials shall be procured from manufacturers whose products are time tested and have the approval of BIS. The name of manufacturer/or registered trademark and hydraulic proof test shall be marked on all such specials/fittings. As a special case, non-standard MS fabricated bends/specials will be permitted according to site conditions for non -standard bends with the approval of the Engineer in-charge of the work.

10.14.10 CAST IRON MANHOLE COVERS AND FRAMES

The basic requirements of the manhole covers to be used shall be of Heavy Duty grade and Square shape for water supply and circular for drainage work. The manhole covers shall be that manufactured from appropriate grade of cast iron, which shall not be inferior to FE 150 conforming to IS 210 (1978) or latest edition. The manufacture and workmanship shall conform to clause 5 of IS 1726 -1991, IS 210 -1978 & IS 4905 -1968 or their latest versions. Suitable locking devices including that with a Galvanized chain and lock or any such foolproof devices as approved by the Engineer before the supply and erection, the manhole cover/frame shall be provided. The minimum dimension of the manhole cover shall not be

less than 60 cm and shall be coated with approved quality of materials as per IS 1726-1991. Each manhole cover and frame shall have embossed on them an identification mark i.e., the mark "KRWSA" to denote Kerala Rural Water Supply and Sanitation Agency together with the manufacture's name /trade mark.

10.14.11 MECHANICAL EQUIPMENT

The mechanical equipment to be installed in intake structures are as noted below:

(i) Sluice Gates

Sluice gates on the water front side of the intake structure at minimum 3 levels so as to draw the raw water from the surface of river during flood, normal and drought seasons. The sluice gates must have facility to operate from the deck slab of the pump house and necessary gear and wheel arrangements must be provided. The opening in the intake structure (the sluice gate) must be provided with cast iron gratings so that the solid or floating material will not enter inside the intake. Such grating or screens shall be easily cleanable of the debris adhering to them.

(ii) Float & Scale Type Water Level Indicator

Water level indicator of float and scale type fabricated with corrosion resistant material approved by the Engineer in Charge must be provided in the Intake well. The location of the indicator and its design etc. must have the approval of the Engineer before its fabrication / installation. The details must be furnished before the Engineer as a submittal with detailed drawings and specification of construction. The float shall be of Copper, Brass or other corrosion resistant material approved by the Engineer, floats shall have appropriate guide for vertical movement, which shall facilitate easy vertical sliding. The guides shall be corrosion resistant material and fixed in such a manner that the floats in case of any repair, can be removed and kept back in position without disturbing the guides or easy and quick dismantling and refitting is possible.

(iii) Over head gantry crane

The pump house shall be equipped with gantry cranes of appropriate capacity and as per Volume II (scope of work). The gantry crane with pulley block shall have sufficient freedom of movement so that the entire pump house area can be covered by it. The design and other particulars of the gantry crane must be furnished to the Engineer in charge as a submittal before its procurement and got approved by him.

(iv) Pumps and Motors

The pumps and motors supplied and installed at intake structures and at any pumping stations of the project shall be of reputed make. The design of pump set shall be in such a way that energy consumption during the starting and operating conditions are minimum. Pumps shall have optimal efficiency for the specified / desired discharge as per tender throughout the design life of pump set. The selection of number of pump sets shall be made in such a way that at least 50% stand by is available at any time if the number of pump sets required at each station is not otherwise specified. In case of more than one pump working in combination, either in parallel or series, the different working conditions shall be separately studied and the best energy – economy condition shall be selected. The analysis on operation conditions, the design and the performance characteristics of the pump sets shall be furnished to the

Engineer in Charge as a submittal and his prior approval of the same is essential before the actual procurement and installation. In case the tenderer is not the manufacturer of a particular item, he shall disclose the manufacturer of each and every item he proposes to procure for the project. In every such case, he shall present a list of not more than two manufacturers from whom he is planning to procure the items in the order of preference. For preventive maintenance of the pumps, motors and switch gears, consumable spares for the next two years after the completion and commissioning of the work shall be provided by the contractor. The contractor shall also furnish the list of vendors from whom such spares can be procured in future.

(v) Motors, Gears etc.

Motors, gears or such other equipments having constantly moving parts while in service, if installed out door, shall invariably be kept only in metallic boxes / other protective enclosures to protect the equipment from intense sun light, rain and dust. Such items should be quite durable and free from deterioration due to environmental conditions.

(vi) Electrical Panel Boards & Switch gears

It shall be the responsibility of the contractor to supply and install suitably designed electrical panel boards, which shall have necessary provision for taking the power supply from KSEB. All such panel boards shall satisfy and comply with the rules and regulations of the Electrical Inspectorate. The contractor shall carry out all such electrical works through a licensed electrical contractor as per the requirements of IE rules. The design and details of the electrical system at each station together with the specifications of the proposed panel board, circuit breakers, fuse units etc, shall be submitted to the Engineer in charge for his approval, before actual commencement of work and submission to the Electrical Inspectorate. All such items shall be of reputed make and the manufacturer /supplier of each item shall be specified in the submittal along with all other relevant details. The panel boards shall be painted with anticorrosive epoxy paint of approved colour and each installations shall be suitably indicated with name plated on the panel boards. The electrical panels, motors etc. shall be suitably indicated with name plates on the panel boards. The electrical panels, motors etc. shall be suitably indicated with name plates on the panel boards earthed as per IE rules. It shall also be the duty of the contractor to obtain necessary clearance and approval of the electrical inspectorate in all the electrical and electro-mechanical equipments provided for the project as a part of this contract. Instances may occur when it may become necessary for providing transformers for drawing power from KSEB and in all such cases, the supply and erection of transformers, yard structures, switchgears and panel boards shall have to be done as a part of this contract as per IE Rules and Regulations. The contractor shall fully envisage these things and shall have to execute all such works through licensed personnel and obtain the clearance of Electrical Inspectorate for the proper commissioning and functioning of the system.

(vii) Deleted

10.15 VALVE CHAMBERS

Valve chambers shall be constructed as per the dimensions provided on the Scope of Work. The construction shall be done only as per the drawing approved by the Engineer in charge. The material used for construction shall be best quality wire cut bricks and both sides plastered

/ RR with inside plastering / RCC depending upon the design load conditions, availability of space environmental impacts etc. Underground valve chambers along motor able roads shall be of RCC. The design of the valve chamber including that of the cover slab indicating the location, size and class of the manhole cover etc. must be furnished to the Regional Project Director before the actual construction, and, his approval must be received before the commencement of the work at site.

10.16 ANCHOR BLOCKS

All the bends in pipelines (from 11 1/4) shall be provided with suitably designed Anchor blocks. The design of Anchor blocks shall be prepared as per the Water Supply Manual and relevant I.S. Codes and got approved by the Engineer in charge before execution.

10.17 DISCHARGE OF EFFLUENT

Discharging any effluent which may either be a bye product of the system or waste from the system, as a result of trial run or otherwise, shall be done carefully not inviting opposition / resistance / objection from any corner. If such discharge requires any form of treatment or any type of civil or other structures for the preservation of original environment conditions, the tenderer shall include such works also in his of forever though such a work has not been envisaged in this document.

10.18 ARCHITECTURAL FEATURE

Architectural features of the structures constructed shall be pleasing, attractive and matching to the site conditions. Selection of colour combinations, ornamental works, materials used for such ornamental works etc. shall be done bearing in mind the following properties as (1) fading phenomenon, (2) resistance to severe climatic conditions (3) strength to withstand unexpected forces that may act on the material / member etc.

10.19 NON DESTRUCTIVE TEST FOR STRENGTH:

Any constructed structure or erected equipment shall be subject to a non destructive test to ensure or certify about its capacity to yield the desired service if required by the Engineer in charge. Such tests shall be the ones specified by the ISS / BSS / CPHE EO Manuals or a more severe test. An equipment / component shall be deemed to have satisfactorily passed such a test only if the Engineer in Charge of the works is satisfied on the performance under test conditions.

10.20 deleted.

10.21 If any of the conditions above are in contradiction to any of the clauses in the scope of Work, the clause/conditions of the Scope of Work shall prevail

10.22 Contractors/Firms shall not appoint/employ directly/indirectly the retired employees of Kerala Rural Water Supply and Sanitation Agency within 3 years of their retirement/Voluntary retirement/ contract termination.

ORDER

As per the Government Order cited 1st and 2nd papers, all tenders for public works costing more than ₹ 5 lakhs shall be invited through E-tender portal on Item Rate Contract only. Vide Government Order read as 3rd and 5th papers, Government have dispensed the Tender Committees at Government level and delegated powers to the Departmental Tender Committees at Chief Engineer, Superintending Engineer and Executive Engineer levels for approving the tenders subject to certain conditions.

2) In order to avoid time and cost over run on account of deviations necessitated during the course of execution of work, as per the Government Order read as 4th above, instructions were issued to all Government Departments and PSUs to ensure the detailed investigation, design, estimation etc while according Administrative Sanction itself. It was also stipulated that if revision of estimates in excess of 10% of Technical Sanction amount is necessitated due to lapses in

investigation / design / planning / estimation, the Officers will be made accountable and proceeded against.

3) As per relevant Clauses of Government approved Standard Bidding Document (SBD), the contractor is bound to execute excess quantities up to 25% of scheduled quantity at contract rates. The criteria to be adopted for fixing the rates for excess quantities and extra items are also mentioned in the SBD.

4) However, some discrepancies have been observed while processing of tenders and execution of works under Item Rate Contracts. Also instances have been noticed where the low quoted items are excluded during execution and excess quantities of high quoted items are executed without adequate technical justification, resulting in heavy loss to the public exchequer.

5) In order to avoid such instances in future, Government are pleased to issue the following clarifications on Item Rate Contracts to all Government Departments and PSUs:-

- 1) Tenders for all public works costing more than ₹ 5 lakh shall be invited through E-tenders on Item Rate Contract only.
- 2) The bidder who has quoted lowest total amount shall be considered as L1.
- 3) The quoted rates of L1 for all items may be compared with current DSR and current LMR. The items whose quoted rates are more than current DSR may be treated as High Quoted Items and less than current DSR may be treated as Low Quoted Items.
- 4) Negotiations shall be done with L1 only to reduce the high quoted rates so as to explore the possibility for bringing them within DSR + 10% tolerance limit or LMR, which ever is lower.
- 5) The admissible contract amount will be least of (i) Negotiated Contract PAC of L1 (ii) Estimate amount based on current LMR and (iii) Estimate amount based on current DSR plus 10% tolerance limit.
- 6) The quoted rates with deviation of more than (+/-) 25% over Technical Sanction Estimate Rates may be treated as Abnormally High Quoted Rates

- (AHQR) item / Abnormally Low Quoted Rates (ALQR) item, as the case may be. In respect of AHQR item, under normal circumstances, the contract rate is applicable for the scheduled quantities in the Agreement only.
- 7) In case of quantities exceeding the agreement schedule quantities and up to 25% limit that are necessitated for proper completion of work, the contract rates of corresponding item shall apply.
 - 8) For excess quantities, i.e, quantities in excess of 25% over agreement schedule quantities, the admissible rates shall be limited to Technical Sanctioned Estimate Rate modified by overall tender excess / tender deficit, as the case may be, subject to a maximum of PWD local market rates prevailing at the time of ordering.
 - 9) In case of ALQR items, sanction of Technical Sanction authority shall be insisted before limiting execution of concerned item less than 75% scheduled quantity.
 - 10) The relevant clauses of Standard Bidding Document (SBD) and Kerala PWD Manual 2012 shall be modified accordingly.

Abstract

Finance Department – Revision of tender fee , Earnest Money Deposit, Performance Guarantee etc – modified orders issued

FINANCE (INDUSTRIES & PUBLIC WORKS - B) DEPARTMENT

G.O.(P) No. 429/15/Fin

Dated, Thiruvananthapuram, 28.09.2015

Read:- 1. G.O(P) No.3/2015/Fin dated 5.1.2015

2. G.O(P) No.295/15/Fin dated 15.7.2015

ORDER

Government issued orders revising/clarifying the rates of tender fee, Earnest Money Deposit, Performance Security Deposit etc vide orders read above. It has now come to the notice of Government that certain points mentioned in the above Government Orders require further clarity to avoid ambiguity while execution of public works. Government are therefore pleased to issue the following modifications on the orders issued in Government Orders read above.

1. Tender fee :-

In order to enhance competition in execution of public works, the cost of tender fee has been rationalized as follows.

Cost of Work	Tender fee
i) Upto Rs. 50,000	i) Rs.300
ii) Above Rs.50,000 - upto Rs.10 Lakh	ii) 0.2% of cost of work (subject to a minimum of Rs.500 and maximum of Rs.2000)
iii) Above Rs.10 Lakh - upto Rs.1 crore	iii) Rs.2500

2500/-

iv) Above Rs.1 crore-upto Rs.2Crore	iv) Rs.5000
v) Above Rs.2 crore – upto Rs.5 crore	iv) Rs.7500
vi) Above Rs.5 crore -upto Rs.10 crore	v) Rs.10,000
vii) Above Rs.10 crore	vi) Rs.15000

2. Earnest Money Deposit (EMD)

Earnest Money Deposit (EMD) is collected to ensure serious participation in the bidding process and this amount will be returned soon after finalising the lowest bidder. Taking into consideration of the fact that fixing higher amount will reduce competition the rates of EMD has been revised as follows.

Cost of Work	Amount of EMD
i) upto Rs.2 crore	i) 2.5% of the project cost, subject to a maximum of Rs 50,000
ii) Above Rs 2 Crore up to Rs 5 Crore	ii) Rs.1 lakh
iii) Above Rs.5 Crore upto Rs.10 Crore	iii) Rs.2 lakh
iv) Above Rs.10 Crore	iv) Rs.5 lakh

3. Government have gone through the CPWD system where Performance Guarantee and Security Deposits are collected in different modes and at different time intervals. The definitions adopted in old and revised PWD manual are also creating some confusions in the following terminologies. Government therefore clarify the position as follows.

i) Performance Guarantee :

Performance Guarantee , the amount collected at the time of executing contract agreement ,will be 5% of the contract value(agreed PAC)and the

deposit will be retained till the expiry of Defect Liability Period. At least fifty percent(50%) of this deposit shall be collected in the form of Treasury Fixed Deposit and the rest in the form of Bank Guarantee or any other forms prescribed in the revised PWD Manual.

ii) Additional Performance Guarantee

Additional Performance Guarantee is the additional amount to be deposited for unbalanced price ie , for works quoted below estimate rate. The collection of additional deposits is a disincentive to the bidder who offers to execute a work below estimated rate and this will induce the contractor to quote a rate equal to or higher than estimated rate. Government therefore decided to do away with additional performance guarantee for all works quoted below upto 10% of the estimate rate. Additional performance guarantee will be required if works quoted between 11% to 25% below estimate rate .

iii)Performance Security Deposit:

Security Deposit is the retention amount deducted from the running bill of the contractors in addition to the performance guarantee. This will be @2.5% of the gross amount of each running bill so that the amount so retained shall be 2.5% of the value of the work done till then. This can be released against Bank Guarantee on its accumulation to a minimum amount of Rs.5 lakh subject to the condition that the amount of Bank Guarantee except last one shall not be less than Rs.5 lakhs. This amount will be released after passing of final bill as in the case of refund of deposit.

4. These instructions will be applicable to all engineering Departments and supercedes the Government orders read above .

5. The revised rates will be applicable to all tenders floated after the date of issue of this order. However cases already settled will not be reopened.

Finance Department- Additional Performance Guarantee- further clarification- Orders issued

FINANCE (INDUSTRIES & PUBLIC WORKS - B) DEPARTMENT
G.O.(P)No.19/2016/Fin Dated, Thiruvananthapuram, 03/02/2016

Read:- G.O.(P) No. 429/15/Fin dated 28.9.2015

ORDER

Government vide order read above ordered among other things that no additional performance guarantee shall be collected for works quoted below upto 10% of the estimate rate to enhance competition . However additional performance guarantee will be insisted if the amount quoted is between 11% to 25% below estimate rate and no tender shall be accepted below this limit to ensure reasonable quality of works.

2. Now doubts have arisen as to whether additional performance guarantee need be collected in case of works having quoted rates between 10% and 11% below estimate rates. The clarifications were also sought as to whether exemption allowed upto 10% below estimate rate need be applied to rates quoted between 10% and 25%. Accordingly the position is clarified as follows.

“ Additional performance guarantee will be required in all cases where quoted rate falls below 10% of the estimate cost but the maximum permissible lower limit is 25% below the estimated cost.

The 10% standard exemption will be applicable to all estimates quoted below estimate cost upto 25 %. If the rate quoted by the contractor is "x%" below estimate cost (where x lies above 10% and upto 25%) the performance guarantee for an amount equal to (x-10)% of the estimate amount shall be obtained from the contractor"

3. Government order read above stands modified to the above extend.

4. This clarification will take effect from the date of order and cases settled otherwise will not be reopened.

Abstract

Finance Department-Award of work when contractor quotes rates less than 75% of the Estimated value of work-clarification-Orders issued.

FINANCE (INDUSTRIES & PUBLIC WORKS - B) DEPARTMENT

G.O.(P)No.124/2016/Fin Dated, Thiruvananthapuram, 29/08/2016

Read:- 1. G.O.(P) No. 13/2012/PWD dated 1.02.2012

ORDER

The clause 2009.4 of PWD Manual 2012 envisages that the tender/quotation with quoted PAC less than 75% of the estimated PAC shall not be accepted, since awarding of such works may lead to failure of contract or poor quality of work executed by the contractor and wastage of public money.

2. At present, estimates are prepared using PRICE Software in DSR 2014. It has been observed that many bids are now received at 25% below or even less than the estimated PAC owing to reduction in cost of bitumen, steel or due to any site specific advantage etc. and transparent competition due to e-tendering. Government therefore consider that the existing clause in PWD Manual need a revisit.

3.The Government after having examined this case in detail, are pleased to issue the following guidelines for processing quotes below 25% of estimated PAC, in partial modifications of Clause 2009.4 of Revised PWD Manual.

- i. The tender with lowest quoted rate less than 75% estimated PAC shall not be rejected if sufficient

- competition is ensured and the rate quoted by the second and third lowest bidder are also comparatively nearer to the lowest bidder.
- ii. The tender inviting authority shall obtain a statement from the lowest bidder quoting rates below PAC regarding the reasonableness of the rate quoted to assess that whether the quoted rates are workable.
 - iii. Assessment shall be made by Department also, as to whether the particular work has any rate advantage as compared to the rate as given in Price Software Viz. reduction in cost bitumen, steel etc.
 - iv. If any contractor quotes less than 75% of the estimated PAC and variation with all other quoted rates are much higher, the Tender accepting Authority shall take appropriate decision based on merits.
 - v. The above guidelines will come into force with immediate effect.

C I R C U L A R

No.18/2019/Fin.

Dated, Thiruvananthapuram, 01.03.2019

Sub:- Procurement of Goods or Services or both or works by Government Departments, Public Sector Undertakings / Autonomous bodies or any agency of Government of Kerala in the context of GST – Clarification issued

Ref:- 1) Government Circular No. 90/2017/Fin dated 14.12.2017.
2) Minutes of the meeting held by the Additional Chief Secretary (Finance) on 06.02.2019.

The Goods and Services Tax (GST) has come into effect in the State with effect from 1st July 2017. As per the Government Circular referred above, certain guidelines were issued regarding the applicability of GST on procurement of Goods, services and Public works arranged by various Government Departments and PSUs. Now, it has come to the notice of Government that certain points in the Circular require further elucidation to avoid ambiguity since the existing DSR and Cost Indices are inclusive of all taxes including VAT / GST and new SoR without tax component is yet to be published by CPWD.

In the meeting held on 06.02.2019, it was observed that the base estimate shall be prepared based on rates devoid of GST. The GST shall

be added to the above base value. Also, TDS should be deducted on the base value.

The Government after having examined the matter in detail, decided to issue following revised guidelines on GST for procurement of Goods and arrangement of services and public works by various Kerala Government Agencies, with immediate effect:-

1. In case of Public Works, for which estimates are prepared based on DSR (Delhi Schedule of Rates), the latest Cost of Indices published by PWD from time to time excluding the VAT / GST component is to be used for arriving estimate rates and it should be without GST Component(s) on the input/input services.
2. In the case of Non-DSR items also, the rate(s) taken for the input/input services should be exclusive of VAT/ GST Component.
3. The Public Works Department shall derive the applicable Cost Indices for various locations excluding the VAT/GST Component and upload in the PRICE software, in time.
4. All bidders for public works, goods and services should have valid GST Registration.
5. The rates quoted by the bidders shall include all taxes and duties Construction Workers Welfare Fund Contribution etc, except the GST.
6. While finalizing the procurement of Goods, Services or both or Public Works, the total amount of the estimates should be arrived exclusive of Goods and Service Tax (GST).
7. For the purpose of determining the lowest bidder (L1), the rates quoted by the bidders exclusive of GST amount should be taken into consideration.

8. For the purpose of issuing Administrative Sanction, the total amount for approval should indicate the estimate amount and GST applicable amounts separately.
9. When the bills for any goods, services or both or Public Works procured are processed, the payment has to be made to the contractor for the total value of the works at contract rates **PLUS** the applicable GST rate.
10. In case of change in the GST rate between the date of invoice and date of supply OR last date of submission of tender (in case of works), and the date of release of payment for works done, the prevailing GST Rate will be reckoned as per the GST laws of the Central and State Governments for payment.
11. Any variations in the tax rate of GST (increase or decrease) shall be adjusted at the time of bill processing i.e, deduction in the case of decrease in GST Rate or addition in case of increase in GST Rate shall be made at the time of settlement of bills.
12. The TDS and other deductions would be on payments made or credited to the supplier excluding GST.
13. The amount deducted as tax under the provisions of GST Act shall be paid into the Government by the deductor within **TEN** days after the end of month in which such deduction is made in the prescribed manner.
14. The deductor shall furnish to the deductee a certificate mentioning therein Contract value, rate of deduction, amount deducted, amount paid into Government in the prescribed manner.

The Circular read above modified to the above extent.

ORDER

As per the Government Order read as 1st paper above, It was ordered that, Performance Guarantee , the amount collected at the time of executing contract agreement will be 5% of the Contract Value (Agreed PAC) and the deposit will be retained till the expiry of Defect Liability Period. Atleast 50% of this deposit shall be collected in the form of Treasury Fixed Deposit and rest in the form of Bank Guarantee or any other forms prescribed in the revised PWD Manual. As per this Government Order, Additional Performance Guarantee is the additional amount to be deposited for unbalanced price ie, for works quoted below estimate rate. Additional Performance Guarantee will be required if works quoted between 11% to 25% below estimate rate. Government Order read as 2nd paper above says that , if the quoted amount of the lowest bidder (L1) is x% below the estimated PAC, the Additional Performance Guarantee shall be (x-10)% of estimated PAC. Subsequent to this Order, clarifications were issued regarding calculation of Additional Performance Guarantee for percentage

rate contracts and item rate contracts vide the Government Order read as 3rd paper above.

2) On account of slow down in economy and acute financial crunch among the contractors due to COVID-19 pandemic, Government of India issued following guidelines vide Office Memoranda read as 4th and 5th papers above and State Governments were requested to consider issuing similar instructions in respect of procurement by the State Government, by State Government Public Undertakings, Local Bodies and all agencies controlled by them.

i) Reduction in Performance Security from existing 5-10% to 3% of the value of the contract.

ii) No provisions regarding Bid Security should be kept in the Bid Documents in future and only provisions for Bid Security Declaration should be kept in the Bid Documents.

iii) No provision should be kept in the Bid Documents regarding Additional Security Deposit/Bank Guarantee (BG) in case of Abnormally Low Bids.

3. As per the Circular read as 6th paper above, it was ordered that the Additional Performance Guarantee may be released in proportion of successful completion of items having low rates. Several contractors and Associations submitted representations requesting to extend the benefits covered by the relief measures announced by the Government of India to the State Government Contractors also.

4. Government have examined the matter in detail and are pleased to order as follows.

1) Performance Security / Security Deposit to be submitted at the time of executing the agreement is reduced from the existing rate of 5% to 3% of the contract amount.

2) Correspondingly Bid Security / Earnest Money Deposit is reduced from 2.50% to 1.50% of the estimated amount.

3) Additional Performance Guarantee is waived for the low quoted items on the condition that the bidder shall furnish an undertaking to execute all low quoted items in full as per contract terms.

5. The above relaxations on account of COVID -19 pandemic are made applicable for works initially for one year and would be reviewed post that date.

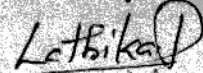

6. This Government Order is made applicable to all new tenders as well as works which have been tendered and awarded, but agreements have not been signed by the winning bidder.

 4. Office Memorandum No. F 9/4/2020-PPD dated 30/12/2021

ORDER

As per the Government Order read as 1st paper above, Performance Guarantee, the amount collected at the time of executing contract agreement will be 5% of the contract value (Agreed PAC). On account of slow down in economy and acute financial crunch among the contractors due to Covid 19 pandemic, Government of India as per Office Memorandum read as 2nd paper above, have reduced Performance Guarantee to be submitted at the time of executing contracts from the existing rate of 5-10% to 3% of the value of the contract. Subsequently Government of Kerala as per order read as 3rd paper above reduced the requirement of Performance Guarantee from 5% to 3% of the contract value for a period of one year.

2) Now Government of India as per Office Memorandum read as 4th paper above extended the validity of Office Memorandum dated 12/11/2020 for a period up to 31.03.2023. Consequently Government have received various requests to extend the benefits on reducing the rate of performance guarantee to contracts executed under the State of Kerala.

3) Government have examined the matter in detail and are pleased to extend the relaxations in Performance Guarantee ordered as per Government Order read as 3rd paper above for a further period up to 31/03/2023.

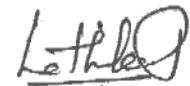

This orders will have retrospective effect from 07/01/2022.

ORDER

The permissions for road cutting for laying various utilities are issued by PWD in accordance with the provisions of the PWD Manual and Highway Protection Act 1999. The Government Orders/Circulars

read above are presently in force regarding the guidelines for charging the restoration amounts and Security Deposits from the users. The laying of pipe lines by KWA in PWD roads and the consequent restoration of the roads is currently causing issues to both the Departments. Hence based on the Meetings held on 05.01.2022 and 18.01.2022 read as 10th and 12th paper above, it has been decided to issue particular direction regarding the trenching of PWD roads, laying of pipelines and their restoration by KWA in the light of the G.O read as 2nd paper above.

2. Government have examined the matter in detail and the following guidelines are issued hereby for road cutting and restoration for laying KWA pipe lines under PWD roads.

A. Utility Agency led Projects

(i) KWA shall apply for road cuttings through the RoW portal in accordance with the G.O read as 5th paper above. The upcoming road works of both KWA and PWD shall be displayed in the RoW portal and updated regularly.

(ii) For urgent leakages and repairs also the permission has to be sought from PWD through the RoW portal. No deposit amount is required for cutting in non DLP roads for emergency leak rectification works. (Repair work can be executed after intimating PWD in case of utmost emergency). Separate provision for sanction of emergency cases should be included in RoW portal.

(iii) In case of Utility laying works, KWA shall carry out the trenching, pipe laying, back filling and final restoration of the road surface. The road surface has to be restored to the same standards that was existing prior to trenching. Estimate of the restoration of roads shall be prepared by KWA in accordance with MoRTH specification and this will be included in the actual Utility laying/shifting/repair works.

(iv) In the case of leakages/repairs, KWA shall carry out road restoration done with plate compactors.

(v) The back filling of the trenches shall be carried out as per the CTE's direction in layers of 20cm thickness with roller/plate compactors for pipe laying works.

(vi) In the case of leakages/repairs, the back filling of the trenches shall be carried out in layers of 20cm thickness with plate compactors.

(vii) For the road restoration of pipe laying works, loosening and re-compacting for a depth of 30cm and provision of GSB and WMM with 15cm thick layers each should be included. The surfacing works should

be in accordance with the MORTH specifications and guidelines.

(viii)The work shall be carried out ensuring strict quality control and only with the supervision of PWD Engineers.

(ix)Minimum earth cushioning of 1.20m over the utility lines should be ensured

(x)As far as possible the laying of utility lines to be carried out through the shoulder portion and the alignment to be fixed through a joint inspection by both the Departments at EE level.

(xi)In case of road cutting and restoration works arranged by KWA in roads where resurfacing/upgradation works by PWD is scheduled, the restoration should be carried out excluding the provisions in the road work of PWD

(xii)A security deposit of 10% of the restoration amount required for the road cutting area to be remitted to PWD by KWA for the DLP existing roads, which will be released after the DLP of the restoration work and a tripartite agreement to be executed with PWD, KWA and the contractor who is carrying the work. Physical agreement keeping can be eliminated and the facility shall be made available/included in the online portal.

(xiii)All the quality control tests mentioned for road works in the Quality Manual of PWD to be carried out by KWA through accredited labs/institutions and the relevant test certificates to be submitted to PWD in the case of utility shifting/pipe laying.

(xiv)KWA shall submit the security deposit as above in the form of Treasury Savings Deposit/Bank Guarantee for obtaining sanction.

(xv)The time frame for completion of pipe laying and road restoration shall be specified in the permission letter and for delays/variations from the original sanctioned scope of trenching, the security deposit shall be forfeited proportionally.

(xvi)Display boards at site showing the details of work arranged by KWA with date of completion during execution and DLP details on completion of work should be erected.

(xvii)DLP conditions in accordance with existing PWD guidelines will be applicable for the restoration work done by KWA.

(xviii)The responsibility of the stretch handed over for trenching including safety arrangements and the maintenance during DLP of the restored portion shall vest with KWA limited to the length of the road where utility provider restored.

(xix)KWA shall take necessary steps to carry out the road cutting works, if any scheduled before arrangement of works by PWD.

(xx)In case of roads with existing DLP, the DLP responsibility of the road stretch where restoration is done will be vested with KWA.

(xxi)No road cutting will be permitted in roads which have been resurfaced for a period of one year from the date of completion of the work. Exemption may be granted on a case to case basis considering the importance like urgent leakage work, prestigious works, high priority works.

(xxii)For roads under DLP, beyond the first one year, the Executive Engineers, shall exercise powers to issue road cutting permit as mentioned in the G.O read as 5th paper above.

(xxiii)In the case of new bridge constructions, the provision for separate duct/platform for carrying the utilities shall be included in the design by PWD based on the requirement of user agency and the expenditure for the construction shall be met by the concerned agency.

(xxiv)In the case of existing bridges, the utilities already installed should be shifted in a phased time bound manner from the bridge by the user agency and separate provision for routing the same has to be made by the concerned agency.

B. PWD led Projects

(i)PWD shall apply for utility shifting necessitated in road constructions through the RoW portal in accordance with the G.O read as 5th paper above. The upcoming road works of both KWA and PWD shall be displayed in the RoW portal and updated regularly.

(ii)While preparing the estimates for utility shifting by KWA for PWD led works the provisions should be same as that of the existing lines (ie.same dia of pipe, same material etc). The estimate for utility shifting shall be prepared by EE, KWA as per the G.O read as 8th paper above.

(iii)The estimate for utility shifting shall includes the works associated with pipe lines/sewer lines such as shifting/raising of valve chambers/manholes and all allied works.

(iv)The utility shifting/pipe laying works shall be supervised by KWA. The quality of works and quality of materials such as pipes/specials and allied materials shall be ascertained by KWA officials through site or factory test as is applicable.

(v)The Security Deposit for utility shifting (replacement of pipes) needs to be deposited by PWD.

(vi)A security deposit of 10% of the utility shifting amount required for replacement of pipes to be remitted to KWA by PWD for all pipe

shifting works, which will be released after the DLP of the pipes work and a tripartite agreement to be executed with PWD, KWA and the contractor who is carrying the work, the facility shall be included in the online portal.

(vii) PWD shall submit the security deposit as above in the form of Treasury Savings Deposit/Bank Guarantee for obtaining sanction.

(viii) The liability of leakages without obtaining sanction for utility shifting shall be borne by PWD.

(ix) The time frame for completion of pipe laying and road restoration shall be specified in the permission letter and for delays/variations from the original sanctioned scope of quality of pipes, design etc, the security deposit shall be forfeited proportionally.

(x) Display boards at site showing the details of work arranged by PWD with date of completion during execution and DLP details on completion of work should be erected.

(xi) In case where the utility shifting/pipe laying work is executed through the contractor for the PWD road work, the contractor shall be liable for any leakage/maintenance work during the DLP for the pipe laying work/road restoration work associated during the maintenance period or upto the date of handing over the utility to KWA, not to exceed six months after the completion of the work.

C. General

(i) While preparing the estimates for new road constructions the provisions for utility ducts to be included in consultation with the utility providers based on their requirement if there is ample PWD land available for such works. In the case of existing roads the additional provisions for utility ducts shall be explored.

(ii) The committee constituted as per the G.O read as 11th paper above shall consider the major disputes arised, if any, between both the Departments and the decision of this committee will be treated as final.

നിർവ്വഹണത്തിനായി ഏറ്റെടുത്തിട്ടുള്ള പദ്ധതികളുടെ ഗുണഭോക്തൃ സമിതിയുടെയും സ്ഥാപനങ്ങളുടെയും പ്രതിനിധികൾ ഉൾപ്പെട്ട പദ്ധതി നിർവ്വഹണ സംവിധാനമാണ് ഗ്രാമപഞ്ചായത്ത് തല ആക്ടിവിറ്റി കമ്മിറ്റി (GPLAC). ഇത് പദ്ധതി നിർവ്വഹണത്തിന് വേണ്ടി മാത്രമുള്ള സംവിധാനമാണ്. ഗ്രാമപഞ്ചായത്തിലെ ഒരു ഗുണഭോക്തൃസമിതി / SLEC യിൽ മാത്രമാണ് പ്രവൃത്തികൾ നടത്തുവാനുള്ളതെങ്കിൽ പ്രത്യേകം GPLAC രൂപീകരിക്കേണ്ടതില്ല. GPLAC യ്ക്ക് പകരം പ്രസ്തുത സമിതിയാണ് പ്രവൃത്തികൾ നടപ്പിലാക്കുന്നത്. വ്യക്തിഗത ഗുണഭോക്താക്കൾക്കുള്ള പദ്ധതി മാത്രമുള്ള ഗ്രാമപഞ്ചായത്തുകളിൽ ഗുണഭോക്താക്കളുടെ ഒരു സമിതി രൂപീകരിച്ച് പ്രവൃത്തികൾ നടത്താവുന്നതാണ്.

പഞ്ചായത്തിൽ ഒന്നിൽ കൂടുതൽ ഗുണഭോക്തൃ സമിതികളിൽ / സ്കീം ലെവൽ കമ്മിറ്റിയിൽ പ്രവൃത്തികൾ നടത്തേണ്ടതുണ്ടെങ്കിൽ ആ സമിതികൾ പദ്ധതി നടത്തിപ്പിനായുള്ള GPLAC യിൽ അംഗമാകണം. മുൻ വർഷങ്ങളിലെ പദ്ധതികളുമായി ബന്ധപ്പെട്ടു നിലവിൽ GPLAC പ്രവർത്തിക്കുന്ന ഗ്രാമപഞ്ചായത്തുകളിൽ, പ്രവൃത്തികൾ നടപ്പിലാക്കുന്ന പുതിയ സമിതിയുടെ 2 പ്രതിനിധികളെയും, സ്ഥാപനങ്ങൾ ഉണ്ടെങ്കിൽ അവരുടെ 2 പ്രതിനിധികളെയും കൂടി GPLAC യിൽ ഉൾപ്പെടുത്തേണ്ടതാണ്. വ്യക്തിഗത ഗുണഭോക്താക്കൾക്കുള്ള പദ്ധതി ഉണ്ടെങ്കിൽ അവരുടെ ഒരു പ്രതിനിധിയെ കൂടി ഉൾപ്പെടുത്തണം. പൊതു ഇടങ്ങളിലെ പദ്ധതിയാണെങ്കിൽ അവിടെ ഒരു സമിതി രൂപീകരിക്കുകയും ഒരു പ്രതിനിധിയെ GPLAC യിൽ ഉൾപ്പെടുത്തുകയും വേണം. നിലവിൽ GPLAC ഇല്ലാത്ത ഗ്രാമപഞ്ചായത്തുകളിൽ മേൽ പറഞ്ഞ രീതിയിൽ അംഗങ്ങളെ ഉൾപ്പെടുത്തി പുതിയ GPLAC രൂപീകരിക്കേണ്ടതാണ്. ഈ പ്രതിനിധികൾ ചേർന്ന് GPLAC ക്ക് പ്രസിഡന്റ്, സെക്രട്ടറി, ഖജാൻജി ആവശ്യമായ മറ്റു ഭാരവാഹികൾ, എക്സിക്യൂട്ടീവ് അംഗങ്ങൾ എന്നിവരെ തിരഞ്ഞെടുക്കണം. GPLAC രൂപീകരിക്കുന്ന നടപടികൾക്ക് GP നേതൃത്വം നൽകണം.
